JUL 24 1985

Subject: Compliance Inquiry Letter  
Dated July 10, 1985

C

Dear Mr. Haney:

Following is a list of responses to the violations noted in your inquiry letter dated July 10, 1985.

Violation: In 1983 we transported or offered for transportation our hazardous wastes with a manifest which did not contain the EPA identification number of the designated facility.

Response: Due to changes in personnel and absences of a Hazardous Waste Manager, the manifests were filled out incorrectly. To correct this situation all manifests are typed and reviewed by 3 different people to assure accuracy. All manifests have been corrected. The manifesting has also been assigned to one operator and hazardous waste manager who are responsible for accuracy.

Violation: Training records of current employees working with hazardous wastes.

Response: Toxic chemical awareness training was administered and due to an absence of a waste manager, the hazardous waste training was not given. The hazardous waste training has been given to anyone involved with the hazardous wastes. See exhibit I for an outline of the training given. Also attached are the personnel records of the 2 employees involved with the hazardous wastes from the Company. (See Exhibit II, III).
